Cover letter

The cover letter must answer the following questions:

- What is your company's motivation to set up a circular economy project?
- Has your company already considered a circular economy project? If so, has your company been in touch with possible collaborators, such as political and public actors, private companies, professional associations, civilians, users, etc. for new partnerships?
- Does your company possess the necessary means to carry out the project (human resources, infrastructure, strategy, etc.)? If not, are you willing to free up time and resources?
- Is your company already pursuing a sustainable policy?
- Why is your company a good candidate?
